

Broadfix (BFXBSP120)

Flat Packers Mixed (Bag 120)

The Broadfix Flat Packers have been manufactured with a high percentage of post industrial and post consumer recycled material. As they are made from plastic they will not swell, shrink or rot and they are completely waterproof. Capable of withstanding higher compressive loads than traditional timber flat packers. This also makes them more economical. They are colour coded depending on size for easy identification. Sometimes referred to as a glazing packer or shim, and is a great multi purpose shim. They are ideal for narrower shimming jobs. Stack to the required depth, slide in and you're done. The micro ridged surface prevents slippage under load. The Broadfix Flat Packers Mixed Bag has the following specification: Size 100 x 28mm. Thickness 1mm 20 x Green 1mm 20 x Black 2mm 20 x White 3mm 20 x Grey 4mm 20 x Blue 5mm 20 x Red 6mm

Shim Type	Length (mm)	Width (mm)	Pack Qty.
