

Einhell (EINTECC250UF)

# TE-CC 250 UF Table Saw 2000W 240V

Einhell TE CC 250 UF Table Saw equipped with a carbide precision saw blade is a solid basic machine for precision cutting when shortening and cutting individual workpieces. The flat aluminum table is equipped with excellent sliding properties for precise cuts. Its table can be extended backwards to the right for wider workpieces. A push stick with holder ensures a safe distance from the saw blade. The format sliding carriage supports the execution of exact long cuts. Thanks to the two in one saw blade adjustment, the height and the inclination of the saw blade can be adapted to the respective cutting requirements with one hand. The rip fence is equipped with a fixing on both sides and ensures precise work with its stability. The transverse stop has an angle scale for mitre cuts. The transparent blade guard ensures a better view of the cutting process. The housing is equipped with a chip extraction connection which makes the workplace easy to clean. For mobile use, the foldable underframe of the table saw is equipped with wheels. The accessories holder ensures organised transport. The overload switch protects the motor against damage in the event of an overvoltage and the integrated softstart also protects both the motor and the fuses.

Specifications

- Input Power 2 000W
- No Load Speed 4 500 min
- Cutting Height 78mm
- Angle Stop Max Min 60 60
- Saw Blade Diameter 250mm
- Weight 34 91kg

## Power Source

Corded 240V

## Battery Supplied

-

## Input Power (W)

2000

## Blade Diameter (mm)

-

## Bore Diameter (mm)

-

## Depth of Cut 90° (mm)

-

## Depth of Cut 45° (mm)
