

Dimension

14 & 22 mm x 129 mm (thickness x width)

Grades See images on the back side

CLASSIC

This grade has a uniform look with some colour and structural graining variation between the individual staves. Lighter tones of colour along the grain pattern and in the sapwood only to a limited extent. Few small knots and natural fine splits occur.

HARMONY

This grade has a natural look with more colour and structural graining variation between the individual staves. Lighter tones of colour are seen along the grain pattern and in the sapwood. Medium sized knots and natural fine splits occur to some degree. Knots and other irregularities are factory filled with a one colour filler.

VARIATION

This grade has a rustic look with substantial colour and structural graining variation between the individual staves. Extensive areas with lighter tones of colour are seen along the grain pattern and in the sapwood. Several small and large knots and natural fine splits occur. Knots and other irregularities are to the greatest extent possible factory filled with a one colour filler.

About the floor

Oak is a hardwood species characterised by being hard-wearing and therefore very suitable for flooring. The wood has a warm and golden glow with an interesting grain structure. Over time the natural ageing gives the wood an authentic appearance.

Junckers solid hardwood flooring is produced and categorized in accordance with EN 13629, EN 14342 and Junckers own factory standard. The floors are made exclusively from solid hardwood and the images illustrate the colour, knots and structural graining variation characteristic for the specific wood species and grade.

Each image shows the average appearance of the grade. It is normal to see a variation in appearance between individual boards, staves and floors produced and installed at differing times.

Up to 5% of the staves may contain features of the next style.

Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.
